

# AfricaCom 2020

9-12 November

## Join IP Infusion at AfricaCom 2020

Disaggregation – open networking – is gaining significant momentum across the globe as carriers and ISPs actively look at ways to simplify their networks, reduce vendor lock-in while simultaneously reducing CAPEX and OPEX.

As a leader in this market segment with over 20 years of experience, IP Infusion understands the needs and complexities that the Telco sector faces and are ideally positioned to address and support these needs.

In partnership with Telecom Infra Project (TIP), IP Infusion would like to invite you to join us at **AfricaCom 2020** to hear first-hand how disaggregation can help you and your company to take advantage of this hugely successful and growing market segment. We invite you to click on the links below to set up a suitable time to meet with us to explore these solutions in greater detail.

**We look forward to meeting with you in the TIP pavilion!**
