IP Infusion invites you to join us at the Big 5G event to be held from September 22–24

Come talk to us about how we:

- Provide end-to-end solutions to transform 5G mobile networks, with open-network NOS
- Address multiple use cases, including 5G X-haul solutions for Cell Site Gateways, optical transport, aggregation and Data Centers
- Deliver Disaggregated Cell Site Gateway (DCSG) and Optical (Cassini) solutions compliant to Telecom Infra Project (TIP) specifications

Learn how IP Infusion's disaggregated networking solutions enable you to reduce total cost of ownership, increase flexibility, and to deploy new features and services quickly.

Visit our Virtual Booth while attending the show

Listen to our industry expert

Shaji Nathan, IP Infusion's Vice President, Product Marketing, will be participating on the "Disaggregating the 5G X-haul Network" panel discussion.

The panel will take a deep dive into prospects and opportunities for disaggregation in X-haul. Shaji will share his vision of the disruptive trend in the telecom networks, the real commercial deployments of the X-haul network to support 5G, with operators including AT&T and Telefonica leading the charge.

Tuesday, September 22, 2020
1:50 pm - 2:25 pm Central Standard Time
